IDEAL TECH INNOVATIONS LLP

ABOUT US

Ideal Tech Innovations LLP specializes in precision moulds manufacturing and CNC machining, delivering reliable, high-performance engineering solutions for diverse industrial applications. With a strong focus on accuracy, efficiency, and quality, we transform complex requirements into production-ready solutions.

Equipped with advanced CNC machinery and precision inspection systems, we support projects ranging from single cavity prototypes to high cavity production moulds up to 48 Cavity. Our disciplined processes and technical expertise ensure consistent quality, faster turnaround, and long-term value for our customers.

OUR MISSION & VISION

- To convert engineering intent into accurate, production-ready solutions by applying structured processes, skilled expertise, and a commitment to doing things right the first time.
- To be known for disciplined engineering and dependable manufacturing—where every solution reflects precision, responsibility, and long-term thinking.

OUR CAPABILITIES

- PET PREFORM INJECTION MOULD
- HOT RUNNER SYSTEMS
- ISBM
- EBM
- HOT PLATE MOULD

VERTICAL MACHINING CENTER

- COSMOS(CVM 800)
- *Make: Cosmos Machine Tools*
- STM (VL850)

Make: STM Engineers.

CNC TURNING CENTERS

- LMW (L5)
- LMW (L7)
- *Make: Lakshmi Machine Works*

SURFACE GRINDING

- COSMOS (700 x 400)

Preform Testing Machine

- *Magna mike*

Moulds Testing Machine

- *Milacron 200 Ton*

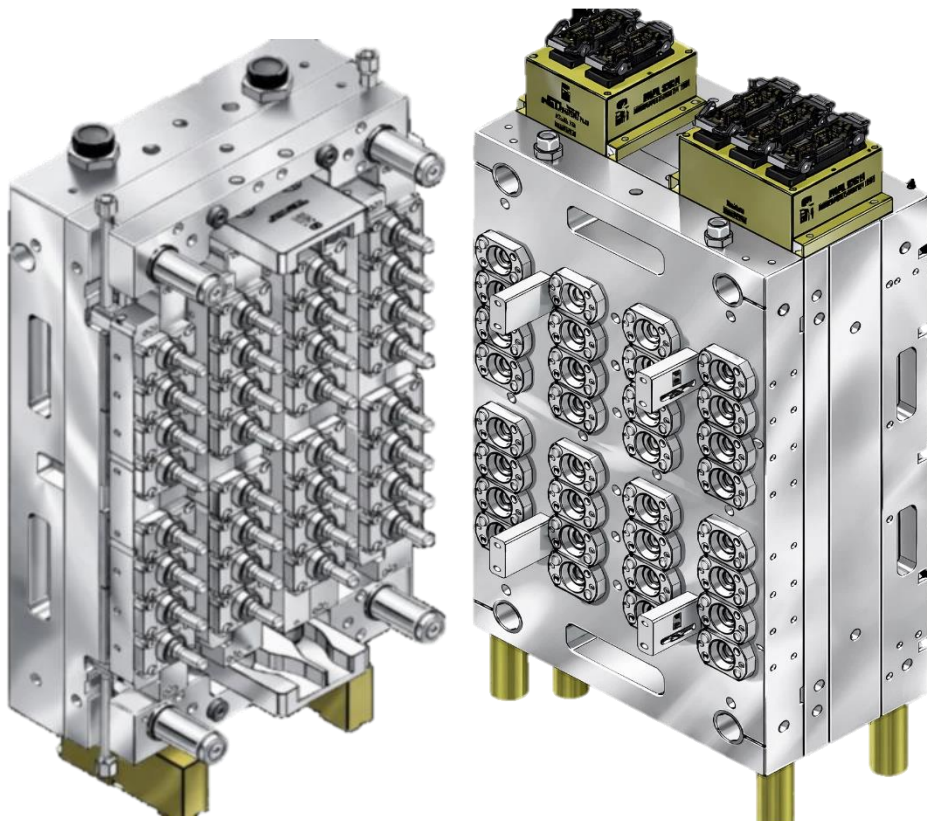

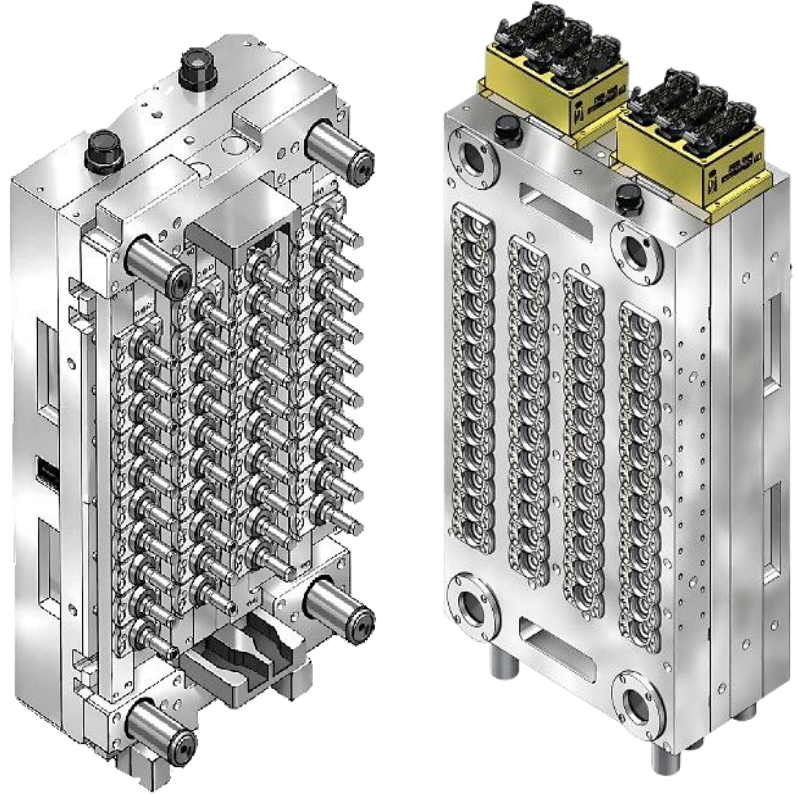

48 CAVITIES PREFORM HOT RUNNER MOULDS

NECK SIZE:28mm

MOULD SIZE: 930mm X 550mm X 540mm

SUITABLE INJECTION MACHINE: 200 TON

32 CAVITIES PREFORM HOT RUNNER MOULDS

NECK SIZE:28mm

MOULD SIZE:815mm X 500mm X 525mm

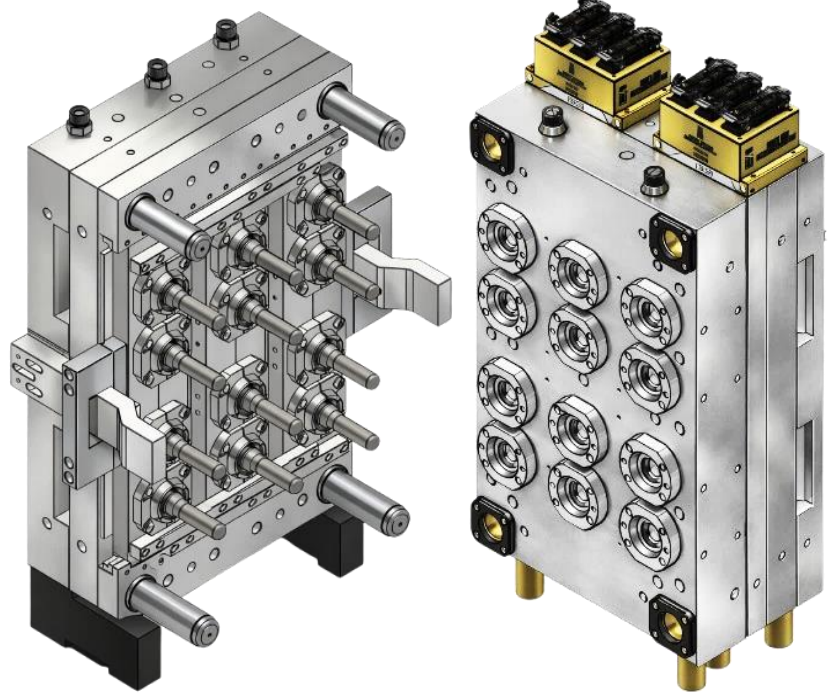

SUITABLE INJECTION MACHINE:150 TON

12 CAVITY JAR HOT RUNNER MOULD

NECK SIZE : 38mm

MOULD SIZE:720mm X 465mm X 540mm

SUITABLE INJECTION MACHINE: 150 TON

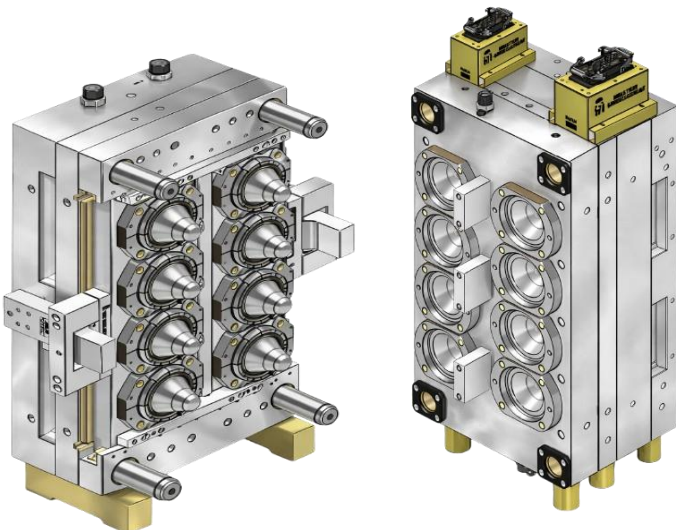

8 CAVITY JAR MOULD

NECK SIZE: 96mm

MOULD SIZE :720mm X 390mm X 505mm

SUITABLE INJECTION MACHINE:150 TON

6 CAVITY CAP MOULD

NECK SIZE: 120mm

MOULD SIZE: 564mm X 446mm X 355 mm

SUITABLE INJECTION MACHINE: 150 TON

8 CAVITY CAP RUNNER MOULD

NECK SIZE: 53mm

MOULD SIZE: 496mm X 386mm X 220mm

SUITABLE INJECTION MACHINE : 150 TON

CHANGE PARTS

PRODUCT NECK FINISH

PCO1881,GME 30.41,26/22,ALASKA,29/21 CTC,ROPP AND MORE

Product Details.

We do provide 2 Cavity, 4 Cavity, 6 Cavity, 8 Cavity, 12 Cavity, 16 Cavity, 18 Cavity, 24 Cavity, 32 Cavity, 40 Cavity, 48 Cavity

DESIGN DEPARTMENT

Precision-engineered cavity and core designs ensuring dimensional accuracy and repeatability.

- * Design optimization focused on material efficiency, weight reduction, and superior product strength.
- * Data-driven simulation for flow analysis, cooling efficiency, and cycle time optimization.
- * Intelligent moulds layout design ensuring uniform filling, balanced pressure, and defect-free output.
- * Design solutions tailored to customer-specific requirements, industry standards, and application needs.
- * Seamless integration of hot runner and cooling system design for enhanced productivity.
- * Interchangeable and scalable design concepts compatible with global moldings systems. Continuous innovation through advanced software tools and best-in-class engineering practices.

QC DEPARTMENT

Our Quality Control Department is equipped with advanced inspection facilities to ensure superior accuracy and consistent quality in moulds and preforms. Precision Mitutoyo measuring instruments are used for dimensional and tolerance checks of mould components, while Magna-Mike preform testing equipment ensures accurate, non-destructive wall thickness measurement. Every product is thoroughly inspected to meet strict quality standards and customer specifications.

ASSEMBLY DEPARTMENT

Our Assembly Department is equipped with skilled technicians and precision tools to ensure accurate and efficient assembly of mould components. Each mould is carefully assembled, aligned, and tested to achieve smooth operation, dimensional accuracy, and reliable performance. Strict process control is followed to deliver high-quality, ready-to-use moulds that meet customer requirements.
